

# Nature's Laundry Ball

by  
**Shower  
Power**

## Washing Machines

The Power Ball is made of approximately 80 naturally occurring minerals bound into nearly 100 ceramic beads.

The beads have a similar action to detergent. They raise the pH of water and lower the surface tension of dirt in the fabric, lifting the dirt from your clothes.

The beads put no additives or chemicals in the wash.

As the mineral beads are ceramic they last a long time and in fact are guaranteed to wash your clothes for 1,000 washes/3 years.

You can still use your stain removers, bleach and softeners if you wish.

### **BENEFITS:**

- Eco friendly – No toxic chemicals or harsh detergents leaving soap-free clothes, sheets and bath towels (important for people suffering allergies).
- Towels and other fabrics remain soft with no residual soap and a non-soapy effluent for your garden.
- Blacks will not streak.
- Colours remain natural – not being affected by bleach carried in some detergents.
- Save hundreds of dollars.
- Saves water and electricity.

### **REQUIREMENT:**

- 2 balls for 5–10kg machine
- 1 ball for less than 5kg machine

## Dryers

The Dryer Balls (2 included) are shaped like an oval, spiky football and are designed to separate the items in the dryer enabling them to dry much quicker saving energy, electricity costs and greenhouse gas emissions.

**REQUIREMENT:** 2 balls per machine
